PROFILE

B.Com in Computer Applications graduate with professional training in Data-Driven Business Analytics and hands-on Business Analysis project experience. Business Analyst Intern at Zoople Technologies with experience preparing SRS documentation, translating business requirements into user stories and acceptance criteria, creating UML use-case/activity diagrams and process flows, and documenting business rules for a simulated eCommerce transformation scenario. Also brings data, BI, finance, and analytical skills with Python, SQL, Power BI, Excel, and related tools.

EDUCATION

Bachelor of Commerce - Computer Applications Jun 2022 - Mar 2025
Sree Narayana Arts & Science College, Mahatma Gandhi University | Kottayam, Kerala
Relevant areas: Computer Applications, Accounting, Business & Commerce, Quantitative Techniques for Business, Information Technology for Business & Office; exposure to MS Office, IBM SPSS, HTML, and Tally ERP 9.

CERTIFICATIONS & DIPLOMA

Professional Certification in Data-Driven Business Analytics Sep 2025 - Jan 2026
Zoople Technologies | Ernakulam, Kerala
Training: Data Analytics • Python • SQL • Power BI • AWS Fundamentals • Machine Learning • Business Analysis

Professional Diploma in Computerized Financial Accounting Jul 2022 - Feb 2023
ICM Computers | Kottayam, Kerala
Tally ERP 9 • QuickBooks • Peachtree • Financial Accounting • Computerized Accounting • MS Office

TECHNICAL SKILLS

Business Analysis: Requirements Analysis, Requirement Gathering, SRS, User Stories, Acceptance Criteria, UML, Use Cases, Activity Diagrams, Process Mapping, Flowcharts, Gap Analysis, Scope Definition

Methodologies & Collaboration: Agile, Waterfall, Project Planning, Workflow Mapping, Stakeholder Communication, Collaboration Tools

BI & Reporting: Power BI, DAX, Power Query, Advanced Excel, Tableau, MS Office

Programming & Data: Python, Pandas, NumPy, SQL (MySQL), R

Analytics & Statistics: Data Cleaning, Exploratory Data Analysis, KPI Analysis, Descriptive Statistics, Correlation, Hypothesis Testing, ANOVA, Chi-Square

Machine Learning: Scikit-Learn, Linear Regression, Logistic Regression, Decision Trees, Random Forest, SVM, Clustering, PCA, Model Evaluation

Finance & Accounting: Cost Analysis, Variance Analysis, Unit Economics, Financial Accounting, Computerized Accounting, Tally ERP 9, QuickBooks, Peachtree, IBM SPSS

Cloud: AWS Fundamentals

PROFESSIONAL EXPERIENCE

Business Analyst Intern | Zoople Technologies Jan 2026 - Feb 2026
Fresh-to-Home Grocery eCommerce Transformation | Internship Project
Repo: github.com/ashindh/fresh-to-home-e-commerce-srs

- Prepared a Software Requirements Specification (SRS) for a simulated grocery eCommerce transformation scenario, documenting functional and non-functional requirements.
- Translated business requirements into user stories, acceptance criteria, process flows, and UML use-case/activity diagrams covering customer and admin workflows.
- Documented business rules for two physical branches, a 7 km delivery radius, nearest-branch routing, recurring daily subscriptions, inventory management, scheduled delivery, and specified payment requirements.

PROJECTS

Business Analytics Training Projects | Zoople Technologies
Completed during Professional Certification in Data-Driven Business Analytics | Sep 2025 - Jan 2026

Spotify User Retention & Churn Analysis | Team Project
Tools: Power BI, DAX, Power Query, CSV | Repo: github.com/ashindh/spotify-churn-analysis

- Analyzed user-level churn data across 8,000 users and calculated an overall churn rate of 25.89%.
- Segmented churn and retention patterns by subscription type, country, and device and examined engagement and ad-exposure metrics.
- Built an interactive Power BI dashboard using DAX and Power Query for KPI reporting and exploratory segmentation.

Lung Cancer Prediction Using Machine Learning | Individual Project
Tools: Python, Pandas, NumPy, Scikit-Learn | Repo: github.com/ashindh/lung-cancer-prediction-ml

- Prepared and encoded a 309-record survey dataset containing 15 predictor features for supervised classification analysis.
- Applied an 80/20 train-test split and feature scaling before training Logistic Regression and Random Forest classifiers.
- Evaluated both models using accuracy, classification reports, and confusion matrices; each achieved 96.77% test accuracy on the selected split.

Independent Project
Aviation Financial Analytics | Individual Project
Tools: Python, Pandas, NumPy, Scikit-Learn, Power BI | Repo: github.com/ashindh/Aviation-Financial-Analytics

- Cleaned and analyzed 200,000 aviation records and created cost-to-revenue and profitability indicators for financial analysis.
- Analyzed Cost per ASK and applied a Random Forest Regressor to estimate unit cost, achieving R² 0.1778 and MAE of \$2,988.29.
- Fuel Efficiency represented 81.8% of model feature importance; the analyzed dataset contained approximately \$1.03B in total profit, with Power BI reporting for financial and operational performance.
